Really interesting course, the teacher was very clear and she is always trying to explain things to you in the best way. 10 out of 10 really Best wishes for everything	13
I really liked how the exercises helped us understand the theory and how much it prepared us for the mid-term (and probably final exam). I really liked how clear the teacher's explanations were as well.	
Thank you very much for this semester ! It was great to understand microeconomics for once	
Probably the best microeconomics class I've had since I am at university	
Thank you for this course I believe it is the first time I understood microeconomics so well !	
I just have to say that this is the first time I'm feeling good in a micro class, the courses were very interesting and well structured! Thanks a lot!

For the first time in the last 3 years I manage to understand the course and do the mid-term exam (Never had I imagine to get to the end of the calculus, hence to try everything). This year's materials were very complete and thanks to many similar exercises, at home practice made me go through my initial fear of microeconomics. Having the course on Moodle, clear and complete, made it so much easier to follow the class. Thank you. As for tutorial classes, they were going a bit to fast in my opinion (though i understand we need to cover a lot of exercises), and I ended up just writing the solutions without thinking further, just thinking i would do it home. In that matter, how is in person-class even useful? I didn't have the time to have questions. Still, my overall opinion about the class is very positive.

For real the best microeconomics course we ever had, clear and pedagogique !!

These were the best classes of microeconomics that I have ever had. Thank you very much, I loved a lot these courses with you !

Pour moi les cours et TD sont trop rapides. Il est difficile de prendre en note et de comprendre en même temps. Cependant, la qualité des cours est excellente et le cours passe rapidement.

I really love the positivity of the teacher, this really makes you less stressed especially during the presentation. I also liked how one of the tutorial classes had an experiment exercise, which is perfect for learning easily the material as well as making it more entertaining. I really enjoyed attending of this course.

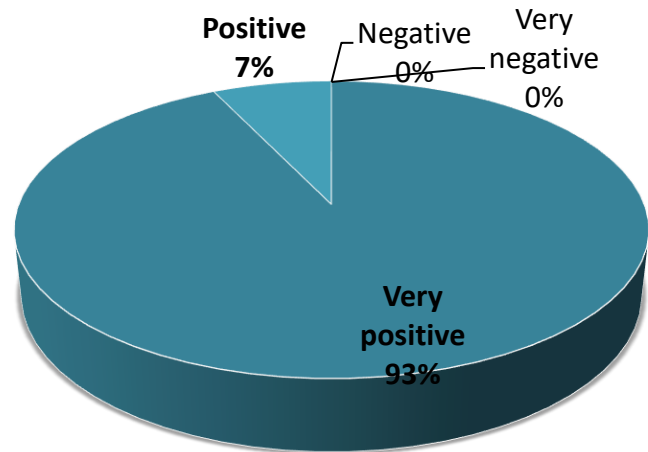

I want to say that it was a pleasure to have course with you because you are a very good professor with good methods to keep students interested.

I just wanted to clarify that I put both positive and negative about my opinion on the course simply because I don't like this degree very much and so all the economics courses: econometrics, macroeconomics, microeconomics etc... are not very exciting for me. And I have to admit that it's very depressing and complex to try to be good, at all costs, and to learn subjects that I'm not interested in since I started my graduate studies. However, this does not mean that your course was bad, on the contrary you are very pedagogical and you have the ability to make your course interesting on some points even for people who do not like the subject and this is a very great quality so I thank you for that. Even though I don't like this subject, you made me appreciate going to classes in this degree, which is usually not the case.

I think all the classes were interesting and captivating, the games that we made were really good to apply and understand concept that we saw in lectures and also engaged us more. since it can be quite hard to follow a course through a computer and in our houses. I think everything went well! Thank you for everything!

You are the best microeconomics teacher I've had so far ! Thanks a lot !

The exercises and all examples made were really clear even online, thank you for that !

In the three years, six semesters and six teachers we had, you are from far the BEST microeconomic's teacher we had. Your class was always very interesting and dynamic. An honest, thank you.

This semester in microeconomics has been great! It's the first time I really understand this subject. Your teaching is very good, and I really liked following your classes, again a big thank you for your listening and your attention to our understanding.

You were one of the best teachers I ever had, so thank you very much.

I understood microeconomics this year, thank you miss.

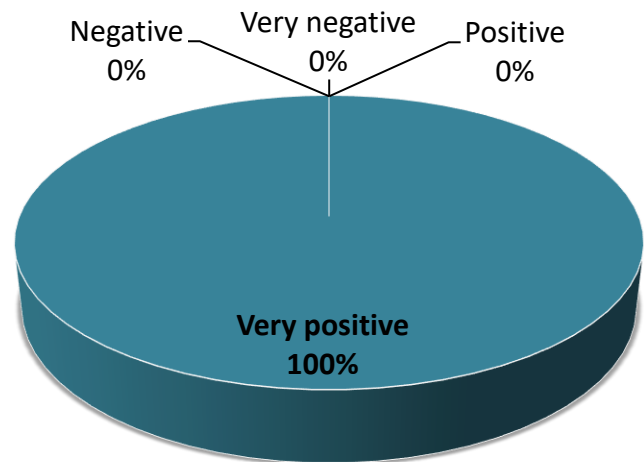

maybe upload the videos of the tutorial classes on moodle if there is a next time (hopefully not)

Everything was very clear, i was able to follow the tutorial lessons without practising micro's exercises before this year. Thank you so!

I wanted to thank you because you were really clear about everything and wanted to help us with what that was not clear enough and we really appreciated it. So, thank you!
I think that we should talk about more examples during lectures because that is how we can understand the course, the tutorial classes were not only very useful but necessary because without them I don't think I would have been able to fully understand the lectures. Thank you for your courses that were really interesting and for your kindness, I wish you a merry Christmas and a happy new year ! :)
first time in 3 years I understood and liked most of the microeconomics classes, I have really no negative feedback

Keep up the good work.
Negative point: - few tests (November) exam and last exam(January). I think we need to train on the previous exams because there is always a difference between tutorial class and exam.
Positive points: - Teacher was very available to respond to our questions even by e-mail - Good management of the time: example we finished early many times
Lectures and tutorials were very interesting and well taught by an amazing teacher !
The class was very good and one of the best we had this semester.
